## Xiling Li

Tel: 206-228-1052 Email: xiling.li@northwestern.edu Location: Evanston, IL, USA Personal Website: https://xilinggrantli.github.io Google Scholar DBLP

RESEARCH INTERESTS Broadly speaking, my research focuses on security, privacy and trustworthiness of data management and applications including verifiable query evaluation (DB) and privacy-preserving machine learning (PPML), and works extensively with secure multiparty computation, zero-knowledge proof and differential privacy.

**EDUCATION** 

Ph.D. Computer Science, Northwestern University

Jun 2021 - Present

• Advisor: Dr. Jennie Rogers

M.S. Computer Science, University of Washington

Dec 2020

• Advisor: Dr. Martine De Cock

• Thesis: Privacy-Preserving Filter-based Feature Selection with Secure Multiparty Computation

**B.S. Computer Science**, University of California, San Diego

Dec 2016

RESEARCH EXPERIENCE Research Assistant, Northwestern University

Jun 2021 - Present

- <u>ZKSQL</u> (VLDB 2023): Proposed the first work [2] on verifiable and efficient query evaluation with zero knowledge proofs for ad-hoc SQL queries in an operator-at-a-time fashion.
- <u>RESCU-SQL</u> (VLDB 2023 demo): Proposed the first pragmatic OLAP system [1] with all-but-one malicious security for ad-hoc SQL queries.

Research Assistant, University of Washington @PPML Group

Sep 2019 - May 2021

- UbiTtention 2020 Workshop (UbiComp-ISWC 2020): Proposed Mean-Split Gini Impurity algorithm (MS-GINI) [4] for Filter-based Feature Selection (FFS).
- ICML 2021: Proposed the first general FFS-based secure multiparty computation protocol [3] with active security and honest majority, and instantiated feature scoring protocol based on MS-GINI.

TEACHING EXPERIENCE **Guest Lecturer** 

• Database Architecture and Query Evaluation, COMP\_SCI 339, Northwestern University Fall 2023

• Relational Algebra, COMP\_SCI 339, Northwestern University

Spring 2024

**Teaching Assistant** 

• COMP\_SCI 339: Intro to Database Systems, Northwestern University

Spring 2023-2025

INDUSTRIAL EXPERIENCE

Data Scientist, IBM @Watson IoT

Jan 2018 - Aug 2019

- Developed a case-based reasoning system for disaster prevention based on knowledge graph.
- Developed a defective product detection vision system based on object detection of different crucial parts of product and defective classification according to partial detection of the product.
- Developed a real-time multi-face recognition system for warehouse monitoring.

Android Developer, Shenzhen Das Intellitech Co., Ltd @R&D Department

Jul 2017 - Dec 2017

• Developed Android app as the client side of intelligent building systems.

SERVICES

**Reviewer:** ICML 21-25; NeurIPS 21-25; ICLR 22-25; AI STATS 25; Asiacrypt 25

TECHNICAL SKILLS

C++, Python, Java, EMP-toolkit, Scikit-Learn, PyTorch, MP-SPDZ, AWS EC2, Ubuntu, Docker
